Daniel Correa
Software Engineer

Passionate front-end engineer and founder of Next Digital Development. I specialize in building high-performance websites, SEO strategies, and digital branding solutions. With a focus on Next.js, TypeScript, and modern web technologies, I help businesses grow through fast, scalable, and user-centric digital experiences.

Experience

Jan 2024 - Present
Next Digital Development
Web Design and Development

- Founded and scaled a full-service digital agency specializing in web development, SEO optimization, branding, e-commerce, and digital marketing.
- Designed, developed, and optimized websites for businesses across beauty, wedding, e-commerce, and manufacturing industries.
- Led major projects including TN Lashes & Beauty, Hilltop Estate, Hope Island Beauty & Medispa, and DR Racing Kart Australia.
- Built high-performance web applications using Next.js, TypeScript, Prisma ORM, Tailwind CSS, Framer Motion, and Stripe integration.
- Leveraged AI-powered workflows to enhance productivity, enabling a small team to deliver enterprise-grade solutions.

Jun 2020 - Present
CBMR
Engineer and Operations Coordinator

- Led the digital transformation of client management operations by developing a custom CMS with React.js, MongoDB, and Redux, later migrating to Next.js.
- Designed and launched a modern SEO-optimized company website, doubling monthly lead generation and significantly improving online visibility.
- Managed all client communications, documentations, and advertising strategies, contributing to business growth and operational efficiency.
- Managed all client communications, documentations, and advertising strategies, contributing to business growth and operational efficiency.

2015 - 2020
Aeon & Imagine Education
English as a second Language Teacher

- Developed and maintained an educational website built with Node.js to support student access to learning materials.
- Integrated technology into ESL education to enhance student engagement and streamline homework and class preparation.
- Taught a diverse international student base, building strong communication skills adaptable to technical client interactions.

2013 - 2015
TEW Solutions
Graduate Engineer

- Developed software solutions for electrical systems, including PID control programming.
- Implemented private server backup protocols for sensitive data security.
- Used AutoCAD to create detailed system schematics, merging engineering precision with technical design.
